

Additional Product information for Rash Guards

What is UPF ?

UPF stands for **Ultraviolet Protection Factor** and indicates what level of UV radiation is absorbed by the fabric and blocking it from reaching the skin

Whereas, a fabric with a UPF rating of 50+ indicates that up to only 1/50th (or 2%) of UV rays pass through the fabric with that rating.

Standard Chart for UPF Rating for the Fabrics

UPF Rating	Protection Category	% UV Radiation Blocked
15 to 24	Good	93.3 - 95.9
25 to 39	Very Good	96 - 97.4
40 to 50	Excellent	97.5 or more
